Dissemination of research results

- Dissemination officer : Laurence Ramos, CNRS
- 4 levels :
 - Among members
 - Within other European projects
 - Towards wider scientific and technical communities
 - Towards general public

Dissemination : promoting communication to the scientific community and outreach activities

- Web portal (internal and external pages) :
 - Updated by coordinator (UCL)
 - Basic info on DDN's
 - Info on professional societies (SOR, ESR, APS, ACS)
 - Communication on meetings, results, available samples, job opportunities,
 - Newsletters prepared by ESR
- Summer school : expose combined work
- DoDyNet International conference : internationally renowned speakers (polymer synthesis, rheology, fracture and modelling)
- Open scientific conferences and workshops : each ESR presents his work to at least 2 international conferences
- Publishing in high impact scientific journals
- Have to ensure that each publication will be available on an Open Access repository (publication version if accepted by journal or accepted preprint version)

Dissemination : promoting communication to the scientific community and outreach activities

- Broadcast dissemination of training material to serve the scientific community
- Meetings : presentation of posters or short oral communications with the attendance of external research staff of Partner laboratories
- End of the project : a special journal dedicated to DDNs
ex : Journal Soft Matter or Journal of Rheology

Dissemination : promoting communication to a general public

- Web portal : general background info + newsletter from each ESR after each meeting with info for a broad audience
- Creating of podcasts on DDN's (part of training activities)
ex: available on YouTube, « my thesis in 180s » + vote for the best presentation
- Creation of a Facebook page to reach out to future young researchers: alimented by the ESRs
- Press releases given to national mass media
- Research also presented in education fairs and introduced to a general public during open days
